

Propagation Note Taking

Propagation	Hybridization
Write the meaning of propagation:	Write the meaning of hybridization:

Steps to Propagation: Can you draw out and explain your thoughts on propagating strawberry plants in 4 steps?

Step 1: Mother plant	Step 2: Daughter plant	Step 3: Nodes & rooting	Step 4: Transplanting

Propagation Note Taking **Answer Key**

Propagation	Hybridization
Write the meaning of propagation: the breeding of an organism (plant or animal) by natural processes from the parent stock.	Write the meaning of hybridization: the process of plant breeding with an individual of another species or variety.

Steps to Propagation: Can you draw out and explain your thoughts on propagating strawberry plants in 4 steps?

Step 1: Mother plant	Step 2: Daughter plant	Step 3: Nodes & rooting	Step 4: Transplanting	
				

Propagation Note Taking Teacher Guide

In this essential file you will find student propagation note taking sheet (print/copy 1 per student), teacher answer key/review, and slides to guide student understanding of propagation.

How to use *Propagation Note Taking Sheet*: Provide each student with a hardcopy of *Propagation Note Taking*. Students will fill out each portion of the worksheet. Students should have colored pencils/crayons and a pencil with eraser to complete the worksheet.

Propagation Note Taking Slides (optional): Display each slide individually on the SMART board, talk with students about what they see in the picture. Allow students to draw in the appropriate box on their note taking sheet. The slides can also be used as a means of differentiation for students who may need more guidance and instruction for this activity.

Mother Plant

Runners

Node

Daughter Plant

Transplanting
